The 474 as seen in the picture above was made by the Imperial Glass Company. The punch sets can be found in Purple, Green, Emerald Green, and Marigold. Purple is the most difficult to find, although Emerald Green will command the highest prices at auction. The iridescence in the Emerald Green sets can be stunning.

The 474 was produced in a variety of different shapes such as Water sets, Milk Pitchers, Sherbetø, Water goblets, and a couple other shapes. The base glass for the Tumblers and Punch cups also come in a variety of different colors.

Imperial also reproduced the 474 in the following shapes Compotes, Vases and Water sets. The reproduced glass by Imperial was marked with the IG mark on the base of the glass.
